

GROUP 1: ASSETS WORTH OVER \$500,000

Workshop 3: Our Choices

Tristan Lim

I'm a 13-year-old student of the Alice Smith School in Malaysia. I am raising funds for the survivors of Cyclone Nargis in Myanmar. I held an Aquathlon event. I swam over 3km, which I then followed with an 8 km run. Through this fundraiser, I collected a total of \$7,740 for the UNICEF Myanmar Children's Cyclone Appeal.

[See Tristan's video here](#)

"I wanted to do this mainly because I've been to Myanmar and the people there were so nice. I feel sorry for what they have lost. I have everything I need here - my parents and a good education. They lost everything in a split second."

Myanmar?

How do natural disasters affect the planet/people?

Should this be a sustainable development goal? Why/Why Not?

What, if any action, can you take?
